

Care for the people doing the caring.

Facilitators guide the community — reviewing matches, supporting journeys, forming local groups. RTR keeps their time where it belongs: with people.

Progress dashboards

See where every participant is on the learning journey at a glance, and know who is ready for the next step.

A matching queue

Review recommendations side by side and approve or hold each introduction with a single, deliberate action.

Cohort settings

Set regional group sizes, watch seats fill, and open a new circle when a community is ready.

“Every introduction passes through human judgment.”

Facilitator tools exist so that care scales — without ever becoming automatic.
