

HOW IT WORKS

Not a program to complete. A relationship to begin.

Everyone moves through the same four steps, at their own pace — and matching opens only after learning, so every relationship starts from shared understanding.

1

Create your profile

Share who you are, what you value, and how you like to connect — in five welcoming steps.

2

Complete the learning journey

Videos and readings that build a shared foundation for respectful conversation.

3

Meet your match

A facilitator reviews every recommendation. You always choose whether to connect.

4

Build the relationship

Talk, listen, and take part in reconciliation in your own community.

DESIGNED WITH CARE

Welcome before wow

Large type, plain words, one clear action per screen. The body typeface, Atkinson Hyperlegible, was designed by the Braille Institute for maximum legibility.

Consent is a design element

Nothing about a person is shown until they choose to share it. Photos are exchanged only after both people agree to connect.

Abstract, not appropriated

Our motifs — the open circle, the woven strands — are geometric abstractions of relationship, deliberately not imitations of any nation's visual culture.

“Everyone starts from a place of understanding.”

Matching opens only after the learning journey is complete. This is on purpose.
